PERCEPTION

VOLUME 11 1982

Editor-in-Chief Richard L Gregory
Assistant Editors John Harris and Tom Trościanko
Book Reviews Editor Priscilla Heard
Brain and Perception Laboratory, Department of Anatomy, The Medical School, University Walk, Bristol BS8 1TD, England

Contents

Number 1

Editorial 1

Depth, connectedness, and structural relevance in the object-superiority effect: line segments are harder to see in flatter patterns 5
Naomi Weisstein, Mary C Williams, Charles S Harris

A psychophysical investigation of the behavioural relevance of neurophysiological feature detectors (S cells) 19
Gerda Smets

Meridional differences in temporal resolution 25
Barry D Schwartz, Daniel K Winstead, James G May

Thresholds for seeing visual phantoms and moving gratings 35
Patrick Mulvanny, Rodger Macarthur, Robert Sekuler

Further remarks concerning visual images observed following unilateral enucleation 47
C Stewart Gillmor

On the failure to recognize the back of one's own hand 53
Dianne Wuillemin, Barry Richardson

Memory for pictograms, pictures, and words separately and all mixed up 57
Ralph Norman Haber, Barry L Myers

Classification of impossible objects 65
Kōkichi Sugihara

Percept-percept couplings 75
William Epstein

The effect of familiar size at familiar distances 85
Virginia Fitzpatrick, Robert Pasnak, Zita E Tyer

A nonspecific learning effect in the perception of random-dot stereograms? 93
John Weinman, Vicky Cooke

Duration differences: attentional demand or time error? 97
Colin Gray

The assimilation-enhancing effect of a dotted surround upon a dotted test region 103
Michael White

Brightness effects in diffuse and sharp illusory figures of similar configuration 107
Theodore E Parks

Fifth European Conference on Visual Perception, Groot Begijnhof, Leuven, Belgium, 31 August-3 September 1982 A1
Abstracts

Number 2

Editorial 111

The perception of musical rhythms 115
H Christopher Longuet-Higgins, Christopher S Lee

The shape of smooth objects and the way contours end 129
Jan J Koenderink, Andrea J van Doorn

Adaptation to optically reduced size 139
Joseph Scheuhammer, Brian Timney

The effect of forward and backward masking by flash on apparent size 153
John Wilding

Children's errors in copying angles: perpendicular error or bisection error? 163
J Gavin Bremner, A Julie Taylor

The perception of causality in infants 173
Alan M Leslie

Spatial induction of illusory motion 187
Walter C Gogel, Bernard W Griffin

Perceived movement: the Flintstone constraint 201
Albert S Bregman, Michael I Mills

Eye dominance and stereopsis 207
John Weinman, Vicky Cooke

Visual scan patterns of rhesus monkeys viewing faces 211
Caroline F Keating, E Gregory Keating

Characterisation of human behaviour during odour perception 221
David G Laing

Reviews 231

Conferences and meetings 239

Humour 240

Number 3

Editorial 241

An appreciation of the late Cyril Rashbass 245
George Ettlinger

Simultaneous and successive contrast effects in the perception of depth from motion-parallax and stereoscopic information 247
Maureen Graham, Brian Rogers

Effects of visual angle on perspective reversal for ambiguous patterns 263
Antonio Borsellino, Franco Carlini, Massimo Riani, Maria Teresa Tuccio, Angelo De Marco, Piero Penengo, Aurelia Trabucco

Adaptation to incomplete flow patterns: no evidence for 'filling-in' the perception of flow patterns 275
Kenneth I Beverley, David Regan

A cross-cultural comparison of the use of a Gestalt perceptual strategy 279
D N Perkins, Jan B Deregowski

Binocular adaptation that cannot be measured monocularly 287
Jeremy M Wolfe, Richard Held

Study of unaided cross-eyed stereopsis 297
Eugene Hamori, Roy D Broad, Calvin E Reed Jr

Letter identification in words and non-words, with variation in visual angle and delay of position cue 305
Robert T Solman

A note on the masking of pictures 319
Peter M Forster

Visual perception of relative mass in dynamic events 325
James T Todd, William H Warren Jr

A demonstration of the visual importance and flexibility of spatial-frequency amplitude and phase 337
Leon N Piotrowski, Fergus W Campbell

Salt taste sensitivity and stimulus volume: effect of stimulus residuals 347
Michael O'Mahony, Karen Klapman, Joanne Wong, Sanah Atassi

Anomalous perception of extrafoveal motion 359
Donald M MacKay

The big problem with a small detail 361
Pia Parth, Rudolf F Morawetz

Reviews 363

Number 4

Editorial 371

The role of the vertical dimension in stereoscopic vision 377
H Christopher Longuet-Higgins

The interpretation of stereo-disparity information: the computation of surface orientation and depth 387
John Mayhew

Appendix to paper by John Mayhew entitled: "The interpretation of stereo-disparity information: the computation of surface orientation and depth" 405
H Christopher Longuet-Higgins

Transfer of learning in transformed random-dot stereostimuli 409
Nigel R Long

Metacontrast U-shaped functions derive from two monotonic processes 415
Adam Reeves

Visual masking: a unified approach 427
Sybille Anbar, Dan Anbar

The oblique effects of pattern and flicker sensitivity: implications for mixed physiological input 441
Edward A Essock, Stephen Lehmkuhle

Motion perception in the peripheral visual field 457
David Finlay

The construction of a plane from pictorial information 463
Irvin Rock, Deborah Wheeler, Josephine Shallo, Joseph Rotunda

Autokinesis and peripheral stimuli: implications for fixational stability 477
Robert B Post, Herschel W Leibowitz, Charlotte L Shupert

A possible analogy between contours in mathematics—as exemplified by Cauchy's integral formula—and contours in the arts 483
Stanley Gerr

Interpolation during apparent motion 491
Gordon L Shaw, Vilayanur S Ramachandran

Reviews 495

Number 5

Editorial 501

Dynamics of adaptation to contrast 505
David Rose, Ivan Lowe

Direction-specific tilt illusion: with and without gaze fixation 529
Thom Carney

Attentional alterations of slant-specific interference between line segments in eccentric vision 535
Robert D Jansen, Gerald S Blum, Jack M Loomis

Velocity constraints on apparent rotational movement 541
Joyce E Farrell, Axel Larsen, Claus Bundesen

The square-wave illusion and phase anisotropy of the human visual system 547
Lawrence E Leguire, Randolph Blake, Michael Sloane

Equation counting and the interpretation of sensory data 557
Whitman A Richards, John M Rubin, Donald D Hoffman

An alternative explanation of the infant's difficulty in the stage III, IV, and V object-concept tasks 577
Irene Neilson

Metaphor in pictures 589
John M Kennedy

Configurational differences in stereovision 607
Joshua Bacon, Hans Wallach

Rehabilitation of a classical notion of Panum's fusional area 615
Jodi D Krol, Wim A van de Grind

The disparity gradient limit for binocular fusion: an answer to J D Krol and W A van de Grind 621
Peter Burt, Bela Julesz

Perversions 625
Christopher W Tyler

Reviews 627

Number 6

Editorial 631

Locomotion of the blind controlled by natural sound cues 635
Edward R Strelow, John A Brabyn

Visual slant underestimation: a general model 641
John A Perrone

Perceptual learning of illusory contours and colour 655
Angus R H Gellatly

An effective paradigm for conditioning visual perception in human subjects 663
Peter Davies, Geoffrey L Davies, Spencer Bennett

Effect of brightness on perceived distance as a figure-ground phenomenon 671
Hiroyuki Egusa

The ability to see solid form in early infancy 677
Michael Cook, Trevor Hine, Ann Williamson

Detection of moving stimuli in the binocular and nasal visual fields by infants three and four months old 685
David Finlay, Kay Quinn, Algis Ivinskis

Touch and vision in normal and Down's syndrome babies 691
Vicky A Lewis, Peter E Bryant

A depth aftereffect caused by viewing a rotating Ames window 703
David C Rubin

Size discrimination with low spatial frequencies 707
Robert A Smith Jr

On the relativity of pitch 721
G van den Brink

Stroboscopic motion in depth 733
David Finlay

Correspondence strength in apparent movement as a function of short-range and long-range processes: comments on Ullman (1980) 743
J Timothy Petersik, Mark Boring, Melinda McDill

Correspondence strength in apparent movement: reply to Petersik et al 747
Shimon Ullman

From a simple photograph to line representation 749
Amos S Cohen
